

Casing End Seal Type KAWK

Heat shrinkable

- thermal contracting black PE split-shrink system with integrated adhesive for diameter changes of up to 35 %
- thickness 2 to 3 mm
- temperature range max. -30°C to + 120°C

Width / mm	Carrier pipe / DN	Casing pipe / DN
450	75 up to 400	15 up to 750
650	450 up to 750	800 up to 1400

further dimensions available upon request

Application guide

1. clean the pipe surface and ensure it is completely dry and fat-free, 60° preheat
2. place the sleeve with 1/3 of its length tightly on the casing pipe and apply the closure strip
3. attach the adhesive closure strip onto the overlap
4. shrink the sleeve using a soft propane flame, beginning from the casing side
5. shrunken End Seals
