

# Casing End Seal Type KAKT 135-165 Type KAWM 320-800

- from high quality EPDM rubber, NBR available upon request
  - Type **KAKT** DN 125 to DN 200 mm
  - Type **KAWM** DN 300 to DN 800 mm
- the conical shape of the seal allows a cutting down to the desired pipe diameter
- the innovative **KAWM** seal is also conically shaped, however, the conus is wave shaped on delivery
- only six types of **KAKT/ KAWM** end seals cover pipe sizes from DN 125 to DN 800 mm providing an attractive low stock keeping level

## KAWM Application guide

- 1 pull the **KAWM** seal over the **carrier pipe** until the outline of the pipe clearly shows (seal can expand by approx. 10%). The **KAWM** seal will unfold into a conical shape which matches the eccentricity of the carrier pipe
- 2 cut surplus seal above the carrier pipe
- 3 push **KAWM** seal over both the carrier and the casing pipe
- 4 after pushing the **KAWM** seal over both pipe ends push the bellows into the annular space to protect the seal
- 5 fasten the **KAWM** seal with the stainless steel band and fasteners on both the carrier and casing pipe
- 6 End Seal Type **KAWM** supplied with two stainless steel bands and fasteners which are individually adjustable for the largest and the smallest pipe diameters

casing 1 / casing 2 min. OD carrier pipe millimeter	DN
KAKT 135/110-0	125/100-0
KAKT 215/165-0	200/150-0
KAWM 320/270-63	300/250-50
KAWM 402/350-80	400/350-80
KAWM 610/508-160	600/500-150
KAWM 810/710-273	800/700-250
